

As the premier manufacturer of Steel Building Systems in Canada, Steelway is the primary supplier of hockey arenas, aquatic centers, and indoor fields.

SPORTSPLEX
AQUATIC, FIELD & ICE

Whether you require a simple economical building to cover an outdoor rink, a LEED certified soccer complex or a sophisticated multi pad ice rink, Steelway offers an impressive custom designed solution that your community will be proud to call their own.

THE STRENGTH OF STEELWAY

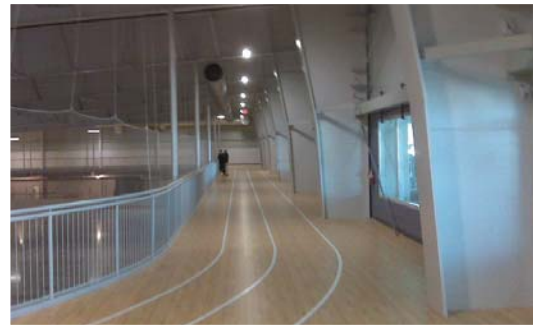

Over the past 30 years, Steelway and our skilled builders have constructed hundreds of recreation facilities. Our buildings provide the designer of your facility with virtually unlimited design combinations to meet the desired architectural look. Steel roof and wall panels such as our RTL-24 Standing Seam Roof, StrucSeal, and StormSeal all provide a unique look. These panels are available in many durable, long lasting colours. All panels can be integrated with many other building materials including insulated foam panels, precast concrete, block, brick, and glass.

Contact Steelway Building Systems to learn more about how you can benefit from the Strength of Steelway on your next recreation project.
